Field of the Invention: --

Page 1, the paragraph of lines 7-8:

The invention relates to a circuit arrangement for averaging according to the preamble of Claim 1 or a circuit for determining the average value of an input signal (s) having:

a signal input for receiving the input signal (s) and

a signal output for outputting an output signal indicating the average value of the input signal;

a counter or a summing unit being arranged between the signal input and the signal output for averaging, the counter being connected on the input side to a comparator.
